

**MAMMAMIA**  
BESTFRIEND IN KITCHEN

BOTTLE COOLER  
**ALFREDO**

RAFFREDDA BOTTIGLIE

## Alfredo, the convenient and simple to use bottle cooler

Alfredo is the convenient and practical bottle cooler from the MAMMAMIA line. It uses neither ice nor electricity, just insert a cooling pad inside the chassis. A single gesture and the pleasure is served.

### The classic wine cooler

- It requires the use of water and electricity to produce ice.
- It's heavy and can be a risk if dropped.
- The bottle is wet, dripping and a napkin is needed to dry it.
- The bottle label is hidden.

### Some of the benefits

- It does not require an unnecessary waste of water or the use of electricity.
- There is no wetting and it does not drip.
- It does not clutter the table.
- The label is important for wine lovers, Alfredo exhibits it in its entirety.
- In addition to keeping the bottle cold, it can also heat it!
- The pad can be placed in hot water or in a microwave oven, an idea for warming baby bottles.

### A few simple gestures

- Remove the pad from the freezer.
- Insert it into the appropriate chassis.
- Let Alfredo keep your bottle at an ideal temperature.
